

### Saturn Vue Hybrid Electric Vehicle Accelerated Testing – June 2007

Two model year 2007 Saturn Vue hybrid electric vehicles (HEVs) entered Accelerated testing during November 2006 in a fleet in Arizona. Each Vue will be operated for 160,000 miles each, at which point their traction batteries will be tested before they are retired. One page vehicle maintenance logs have been posted on nearby www pages. This information includes the date and mileage for all maintenance and repairs performed on the vehicles. The two Vue HEVs have been driven a total of 47,000 miles and the cumulative average fuel economy is 29.0 mpg.
